

TEST REPORT

REPORT NO.:CTNT2412250020402R

Product name: Ceiling fan

Model No.:

TLCFLS-9048

Applicant:

Zhongshancity Chuangzaomei Lighting Electrical Co., Ltd

Test procedure: Entrustment Test

Shenzhen CTNT

430.32(s)(1).		Web: www.ctnt-cert.com		

General conditions for measurements:

1.Test Room

The tests shall be carried out in a room that has an air speed close to the appliance under test of ≤ 0.5 m/s. The ambient temperature shall be maintained at 70 °F ± 5.0 °F, 50% RH±5% RH throughout the test.

2. Power supply

Where this standard is referenced by an external standard or regulation that specifies a test voltage and frequency, the test voltage and frequency so defined shall be used for all tests. Where the test voltage and frequency are not defined by an external standard, the test voltage and the test frequency shall be the nominal voltage and the nominal frequency of the country for which the measurement is being determined ± 1 %.

3. Supply voltage waveform

The total harmonic content of the supply voltage when supplying the appliance under test in the specified mode shall not exceed 2 %; harmonic content is defined as the root-mean-square (r.m.s.) summation of the individual components using the fundamental as 100 %.

4. Power measurement accuracy

Precision measurement of energy consumption shall be made with a precision equal to the greater of 0.1 Watt-hour or 1% of full-scale measurement.
